

THE GEOLOGY OF THE ROSEBERY ORE DEPOSIT

by

R.L. Brathwaite,, M. Sc. Hons. (Victoria  
University of Wellington, N.Z. )

Thesis submitted in partial fulfilment of the  
requirements for the Degree of  
Doctor of Philosophy

University of Tasmania

Hobart

November, 1969

This thesis contains no material which has been accepted for the award of any other degree or diploma in any University, and to the best of my knowledge and belief, this thesis contains no copy or paraphrase of material previously published or written by another person, except when due reference is made in the text of the thesis.

*R. L. Brathwaite*

## CONTENTS

	Page
SUMMARY	1
1. INTRODUCTION	8
1.1 Previous Work	8
1.2 Object and Scope of the Investigation	9
1.3 Acknowledgements	10
2. GEOLOGICAL SETTING	13
2.1 Introduction	13
2.2 Stratigraphy	15
2.3 Metamorphism	23
2.4 Structure	25
2.5 Mineralization	27
3. STRATIGRAPHY AND PETROLOGY OF THE ROCKS OF THE MINE AREA	31
3.1 Massive Pyroclastics	34
3.2 Black Slate	37
3.3 Host Rock	40
3.4 Footwall Schists	44
3.5 Footwall Pyroclastics	47
3.6 Plagioclase in the Tuffs	48
3.7 Metamorphism	50
3.8 Origin of the Footwall Schists	51
3.9 Origin of the Pyroclastic Rocks	52
3.10 Environment of Deposition of the Primrose Pyroclastics	54
3.11 Dolerite Dikes	55

		Page
4.	STRUCTURE OF THE ORE DEPOSIT	59
4.1	Mesosopic Structures and their Macroscopic Geometry	59
4.2	Macroscopic Folds	67
4.3	Interpretation of the Fold Geometry	72
4.4	Faulting	74
4.5	Structural History	75
5.	ORE MINERALIZATION	77
5.1	The Zinc-Lead Orebody	78
5.2	The Barite Orebody	81
5.3	Other Types of Mineralization	82
5.4	Layering in the Ore	88
5.5	Ore Mineralogy	92
5.6	Primary Ore Textures	106
5.7	Metamorphic Features	108
6.	CHEMICAL CHARACTERISTICS OF THE ORE MINERALIZATION	117
6.1	Metal Abundances and Distribution Patterns	117
6.2	Relationships between Metals	124
6.3	Minor and Trace Elements	128
6.4	Sulphur and Oxygen Isotopes	131
6.5	Lead Isotopes	132
6.6	Test for Mode of Deposition of Sulphides	133
6.7	Compositional Zoning within and Between the Orebodies	135
6.8	Wall-Rock Alteration	141

	Page
7. MANGANESE CARBONATE MINERALIZATION	144
7.1 Distribution of the Manganese Carbonates	144
7.2 Composition of the Carbonates	147
7.3 Petrography of the Carbonate Minerals	152
7.4 Deposition of the Manganese Carbonates	157
7.5 Lateral Zoning of the Manganese Carbonates	158
8. ORE GENESIS	160
8.1 Comparison with Similar Ore Deposits	160
8.2 Ore Deposition	163
8.3 Geothermometry	166
8.4 Source of the Ore-Forming Fluid	167
8.5 Reconstruction of the Ore Genesis	169
REFERENCES	174
APPENDIX I	
Stratigraphy of the Cambrian Rocks of the Rosebery Area	194
APPENDIX 2	
Chemical Analyses	213
APPENDIX 3	
Determination of Carbonate Compositions	217
